# SAFETY INFORMATION

A This service manual is intended for qualified service technicians ; it is not meant for the casual do-it-yourselfer. Qualified technicians have the necessary test equipment and tools, and have been trained to properly and safely repair complex products such as those covered by this manual. Improperly performed repairs can adversely affect the safety and reliability of the product and may void the warranty. If you are not qualified to perform the repair of this product properly and safely, you should not risk trying to do so and refer the repair to a qualified service technician.

WARNING !

B THE AEL (ACCESSIBLE EMISSION LEVEL) OF THE LASER POWER OUTPUT IS LESS THAN CLASS 1 BUT THE LASER COMPONENT IS CAPABLE OF EMITTING RADIATION EXCEEDING THE LIMIT FOR CLASS 1.  
A SPECIALLY INSTRUCTED PERSON SHOULD DO SERVICING OPERATION OF THE APPARATUS.

LASER DIODE CHARACTERISTICS

FOR DVD : MAXIMUM OUTPUT POWER : 5 mW  
WAVELENGTH : 650 nm  
FOR CD : MAXIMUM OUTPUT POWER : 5 mW  
WAVELENGTH : 780 nm

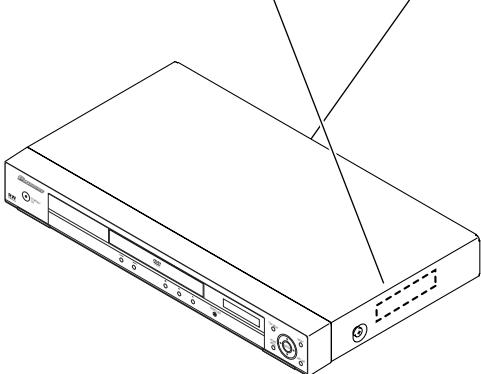

C

## LABEL CHECK

Location: inside of the unit

CAUTION : CLASS 1M LASER RADIATION WHEN OPEN. DO NOT VIEW DIRECTLY WITH OPTICAL INSTRUMENTS. 726000A140 SH  
Vorsicht : KLASSE 1M LASER Strahlung: Bei geöffnetem Gerät nicht mit optischen Geräten in den Laserstrahl blicken.  
PRECAUCIÓN : RADIAZIÓN LASER CLASE 1M, AL ABRIR NO MIRAR DIRECTAMENTE CON INSTRUMENTOS ÓPTICOS.  
VIKTIGT : KLASSE 1M LASER STRÄLNING: NÅR APPARATEN ÄR ÖPPEN, TITTA INTE RAKT IN I DEN, SPECIELLT INTE OM DU HAR GLASÖGON PÅ DIG.  
Varoitus! : Luokka 1M:n lasersäteily: Älä koskaan katso laitteen sisään sen ollessa auki-ei myöskään silmälaseilla tai muilla optisilla laitteilla!  
ADVARSEL : LASERSTRÅLER KLASSE 1M KIG IKKE DIREKTE IND I APPARATET, NÅR DETTE ER ÅBENT. ISÆR IKKE MED BRILLER ELLER ANDRE OPTISKE OBJEKTER.

D

Additional Laser Caution

1. • Laser diode is driving with Q2303, Q2305(650nm LD) and Q2302, Q2304(780nm LD) on the DVD MT PCB Assy. Therefore, when short-circuit between the emitter and collector of these transistors or the base voltage is supplied for transistors turn on, the laser oscillates. (failure mode)  
• In the test mode \*, there is the mode that the laser oscillates except for the disc judgment and playback. LD ON mode in the test mode oscillates with the laser forcibly.
2. When the cover is open, close viewing through the objective lens with the naked eye will cause exposure to the laser beam.

\* : See page 16.

## Important Check Points for Good Servicing]

In this manual, procedures that must be performed during repairs are marked with the below symbol.  
Please be sure to confirm and follow these procedures.

### 1. Product safety

Please conform to product regulations (such as safety and radiation regulations), and maintain a safe servicing environment by following the safety instructions described in this manual.

- ① Use specified parts for repair.
- Use genuine parts. Be sure to use important parts for safety.
- ② Do not perform modifications without proper instructions.

Please follow the specified safety methods when modification(addition/change of parts) is required due to interferences such as radio/TV interference and foreign noise.

- ③ Make sure the soldering of repaired locations is properly performed.

When you solder while repairing, please be sure that there are no cold solder and other debris.  
Soldering should be finished with the proper quantity. (Refer to the example)

- ④ Make sure the screws are tightly fastened.

Please be sure that all screws are fastened, and that there are no loose screws.

- ⑤ Make sure each connectors are correctly inserted.

Please be sure that all connectors are inserted, and that there are no imperfect insertion.

- ⑥ Make sure the wiring cables are set to their original state.

Please replace the wiring and cables to the original state after repairs.  
In addition, be sure that there are no pinched wires, etc.

- ⑦ Make sure screws and soldering scraps do not remain inside the product.

Please check that neither solder debris nor screws remain inside the product.

- ⑧ There should be no semi-broken wires, scratches, melting, etc. on the coating of the power cord.

Damaged power cords may lead to fire accidents, so please be sure that there are no damages.  
If you find a damaged power cord, please exchange it with a suitable one.

- ⑨ There should be no spark traces or similar marks on the power plug.

When spark traces or similar marks are found on the power supply plug, please check the connection and advise on secure connections and suitable usage. Please exchange the power cord if necessary.

- ⑩ Safe environment should be secured during servicing.

When you perform repairs, please pay attention to static electricity, furniture, household articles, etc. in order to prevent injuries.  
Please pay attention to your surroundings and repair safely.

### 2. Adjustments

To keep the original performance of the products, optimum adjustments and confirmation of characteristics within specification.  
Adjustments should be performed in accordance with the procedures/instructions described in this manual.

### 3. Lubricants, Glues, and Replacement parts

Use grease and adhesives that are equal to the specified substance.  
Make sure the proper amount is applied.

### 4. Cleaning

For parts that require cleaning, such as optical pickups, tape deck heads, lenses and mirrors used in projection monitors, proper cleaning should be performed to restore their performances.

### 5. Shipping mode and Shipping screws

To protect products from damages or failures during transit, the shipping mode should be set or the shipping screws should be installed before shipment. Please be sure to follow this method especially if it is specified in this manual.

# NOTES ON USE

## NOTES ON SOLDERING

A • For environmental protection, lead-free solder is used on the printed circuit boards mounted in this unit. Be sure to use lead-free solder and a soldering iron that can meet specifications for use with lead-free solders for repairs accompanied by reworking of soldering.

• Compared with conventional eutectic solders, lead-free solders have higher melting points, by approximately 40 °C. Therefore, for lead-free soldering, the tip temperature of a soldering iron must be set to around 373 °C in general, although the temperature depends on the heat capacity of the PC board on which reworking is required and the weight of the tip of the soldering iron.

Compared with eutectic solders, lead-free solders have higher bond strengths but slower wetting times and higher melting temperatures (hard to melt/easy to harden).

B The following lead-free solders are available as service parts:

- Parts numbers of lead-free solder:
  - GYP1006 1.0 in dia.
  - GYP1007 0.6 in dia.
  - GYP1008 0.3 in dia.

## WHEN REPLACING DVD DECK

### WHEN REPLACING DVD DECK

#### [ Removing the DVD Deck ]

Before removing Pick Up PCB and DVD PCB connector, short circuit the position shown in **Fig. 1** using a soldering iron. If you remove the DVD Deck with no soldering, the Laser may be damaged.

#### [ Installing the DVD Deck ]

Remove all the soldering on the short circuit position after the connection of Pick Up PCB and DVD PCB connector.

#### NOTE

- Before your operation, please read “PREPARATION OF SERVICING” .
- Use the Lead Free solder.
- Manual soldering conditions
  - Soldering temperature:  $320 \pm 20^{\circ}\text{C}$
  - Soldering time: Within 3 seconds
  - Soldering combination: Sn-3.0Ag-0.5Cu
- When Soldering/Removing of solder, use the draw in equipment over the Pick Up Unit to prevent the Flux smoke from it.

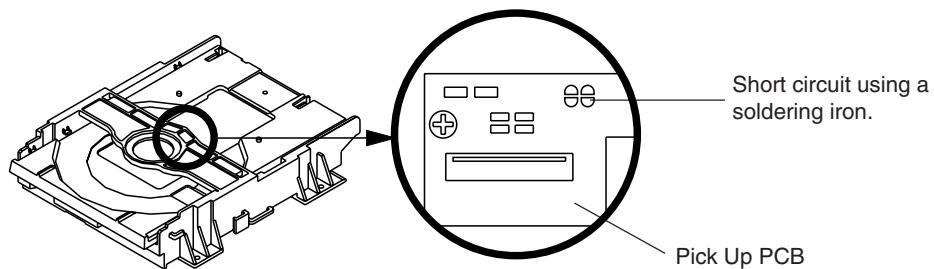

Fig. 1

# DISC REMOVAL METHOD

## DISC REMOVAL METHOD AT NO POWER SUPPLY

1. Slide the Rack Loading (White) toward the arrow direction by using a minus driver to release the lock. **(Refer to Fig. 1)**
2. Manually open the Tray.

**NOTE:** Please strongly pushing Rack Loading (White) to release the lock because the tray doesn't go out easily.

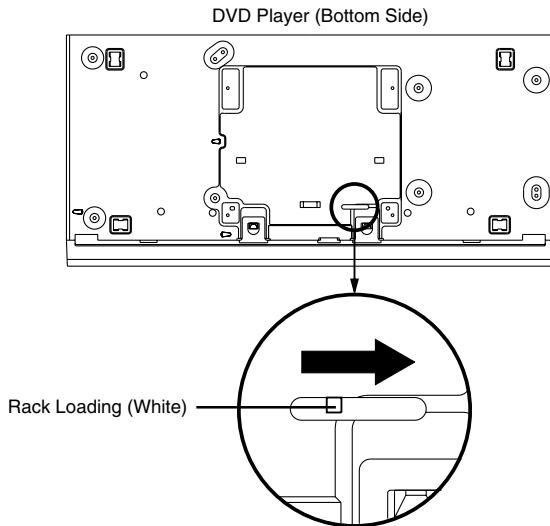

Fig. 1

## PARENTAL CONTROL - RATING LEVEL

### 4 DIGIT PASSWORD CANCELLATION

If the stored 4 digit password in the Rating Level menu needs to be cancelled, please follow the steps below.

1. Set the DVD to the Stand-by Mode.
2. Press and hold the 'STOP' key on the front panel.
3. Simultaneously press and hold the POWER key on the front panel.
4. The 4 digit password has now been cleared.

**NOTE:** The above procedure will reset ALL of the player's settings to the default factory state.

## PREPARATION OF SERVICING

The laser diode used for a pickup head may be destroyed with external static electricity. Moreover, even if it is operating normally after repair, when static electricity discharge is received at the time of repair, the life of the product may be shortened. Please perform the following measure against static electricity, be careful of destruction of a laser diode at the time of repair.

- Place the unit on a workstation equipped to protect against static electricity, such as conductive mat.
- Soldering iron with ground wire or ceramic type is used.
- A worker needs to use a ground conductive wrist strap for body.

## 2.2 METHOD FOR DIAGNOSING DEGRADATION OF THE LDS ON THE PICKUP ASSY

### Case when this diagnosis is required :

When playback of any disc, including a test disc (DVD: GGV1025, CD: STD-905), cannot be performed

### How to diagnose

In the case mentioned above, degradation of the laser diodes (LDs) mounted on the PICKUP Assy is suspected. Measure the voltage between the two ends of one of the resistors mentioned below.

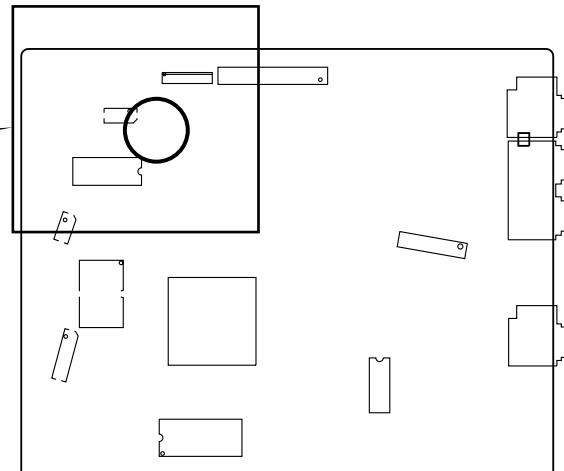

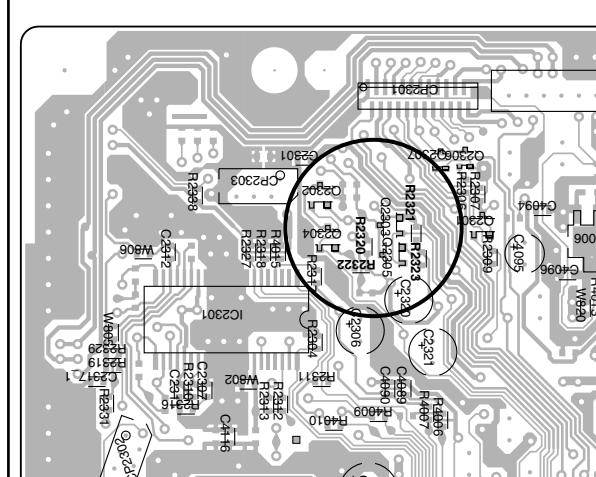

- **No playback of a DVD :**

Measure the voltage between the two ends of R2321 or R2323 on the DVDM Assy. If the voltage is 0.4 V or higher, the 650-nm LD is degraded.

If the measurements show degradation of an LD, replace the PICKUP Assy.

- **No playback of a CD :**

Measure the voltage between the two ends of R2320 or R2322 on the DVDM Assy. If the voltage is 0.4 V or higher, the 780-nm LD is degraded.

### 3. TEST MODE

#### 3.1 TEST MODE PROCEDURE

A

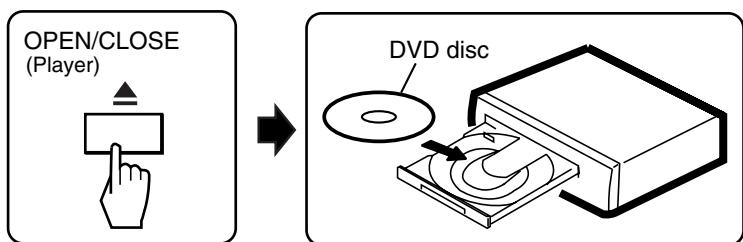

##### POWER ON

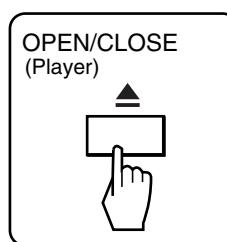

B

##### DISC SET

###### <TRAY OPEN>

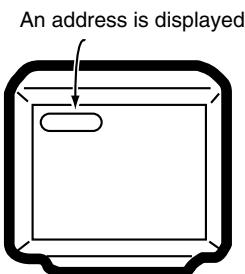

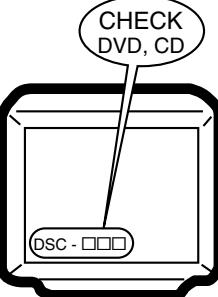

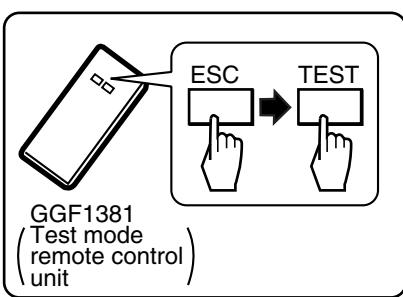

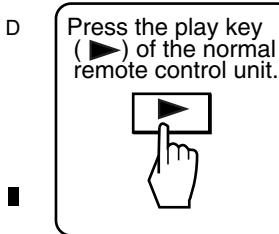

###### <TRAY CLOSE>

C

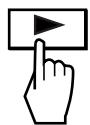

##### TEST MODE: PLAY

###### <PLAY>

D

Press the play key (▶) of the normal remote control unit.

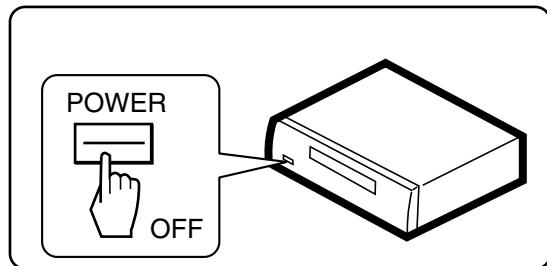

Notes:

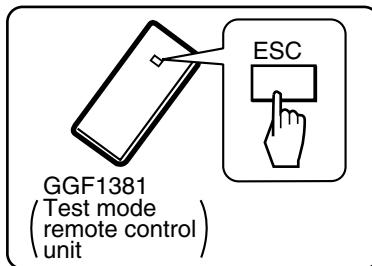

- After going into test mode, if you play back the disc, "DISC-NON" is displayed.
- The video signal and the audio signal are outputted during the test mode.
- The SKIP key and the SCAN key are effective during the test mode.

E

##### TEST MODE: OFF

OR

F

## 3.2 TEST MODE IN

### ■ Test Mode Functional Specification

#### ① Test mode entry

In the power ON state, press the [ESC] (A8-5F) key and [TEST / RANDOM] (A8-5E) key in order of the Test mode remote control unit.

- Light the all FL and LEDs.
- OSD displays test mode.

Note:

\* When pressing the keys of something, the FL displays "NO DISC" and the LED lighting disappears.

A

#### ② Release the Test mode

- Turn off the power.
- Press the [ESC] (A8-5F) key of the remote control unit.

B

#### ③ LD ON

DVD : Press the [TEST] (A8-5E) and [1] (A8-01) keys in order, and turn on the laser diode (650n).  
 CD : Press the [TEST] (A8-5E) and [4] (A8-04) keys in order, and turn on the laser diode (780n).

### • Service mode indication (ESC + CHP/TIM keys)

ID Address

The error rate is always displayed in exponential notation, e.g., \*.\*\* e - \*, for both DVDs and CDs.  
EDC/ID/AV 1 error history (ID Address, EDC/ID Error, last eight errors)

### • Calculation of the average error rate (ESC + "5" [Test mode remote control unit] keys)

The average of the last eight error rates is calculated and indicated in exponential notation. After the calculation is completed, "OK" or "NG" is displayed. If "NG" is displayed, the disc tray will open (for both DVDs and CDs)  
For DVDs: OK with 5.0e-4 or less, for CDs: OK with 7.6e-3 or less

### • Indication of model information (ESC + CHAP keys)

The items from 12 to 15 of the TEST MODE Indications are displayed. However, in the indications, S in the standard test mode is changed to CHIP VERSION, and M is changed to FL VERSION. For details, see 7.1.3.

### • Region confirmation mode (ESC + A.MON [Test mode remote control unit] + "1"- "8" [Test mode remote control unit] keys)

After you press the A.MON key while holding the ESC key pressed and then input the region number, if the number is different from that set in the unit, an error message is displayed, and the tray opens.

## 3.5 FUNCTIONAL SPECIFICATION OF THE SERVICE MODE

### • Display during Service Mode

To enter Service Mode, press the CHP/TIM key while holding the ESC key pressed.  
To quit, press the ESC key.

#### Service mode display

- ① ID Address
- ② Error rate (always displayed), in exponential notation

ERROR RATE : \* \* \* \* \*

( \* \* \* \* )

↑  
Number of error

#### • Calculation of the average error rate

For DVDs: OK with 5.0e-4 or less, for CDs: OK with 7.6e-3 or less

B

ex) For DVDs

• Step 1

# 4. DISASSEMBLY

## 4.1 EXTERIOR SECTION

### 1. REMOVAL OF MECHANICAL PARTS AND P.C. BOARDS

#### 1-1: TOP CABINET/FRONT CABINET/OPERATION PCB (Refer to Fig. 1-1)

1. Remove the 5 screws ①.
2. Remove the Top Cabinet in the direction of arrow (A).
3. Disconnect the following connector: (CP4002).
4. Unlock the 4 supports ②.
5. Remove the Front Cabinet in the direction of arrow (B).
6. Remove the 9 screws ③.
7. Remove the Operation PCB in the direction of arrow (C).

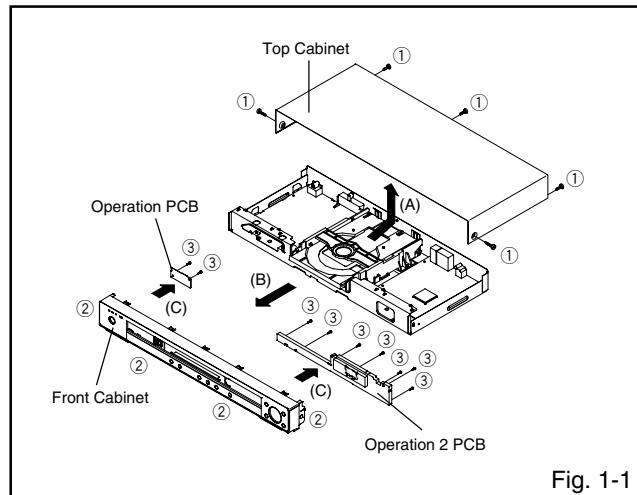

Fig. 1-1

#### 1-2: POWER PCB (Refer to Fig. 1-2)

1. Disconnect the following connectors: (CP502 and CP503).
2. Remove the 2 screws ①.
3. Remove the 4 screws ②.
4. Remove the Power PCB in the direction of arrow.

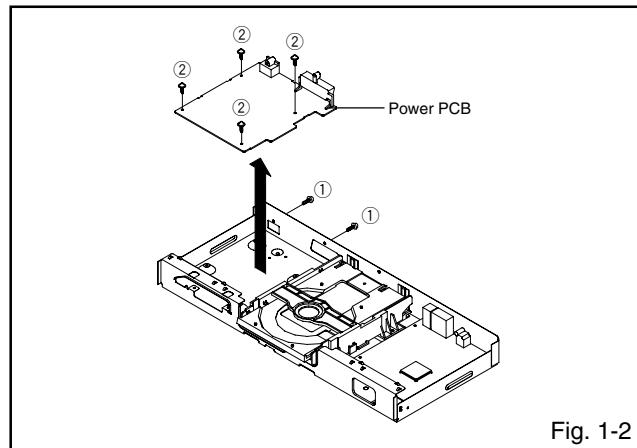

Fig. 1-2

#### 1-3: DVD DECK (Refer to Fig. 1-3)

1. Short circuit the position shown in Fig. 1-3 using a soldering iron. If you remove the DVD Deck with no soldering, the Laser may be damaged.
2. Disconnect the following connectors: (CP2301, CP2302 and CP2303).
3. Remove the 4 screws ①.
4. Remove the DVD Deck in the direction of arrow.

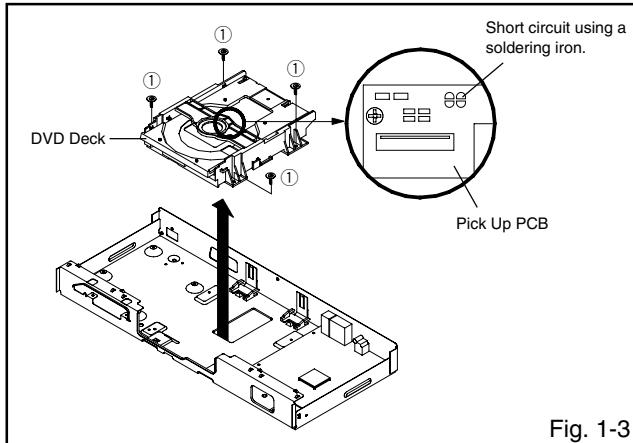

Fig. 1-3

#### NOTE

1. Before your operation, please read "PREPARATION OF SERVICING".
2. Use the Lead Free solder.
3. Manual soldering conditions
  - Soldering temperature:  $320 \pm 20^\circ\text{C}$
  - Soldering time: Within 3 seconds
  - Soldering combination: Sn-3.0Ag-0.5Cu
4. When Soldering/Removing of solder, use the drawing equipment over the Pick Up Unit to keep the Flux smoke away from it.
5. When installing the DVD Deck, remove all the soldering on the short circuit position after the connection of Pick Up PCB and DVD MT PCB connector.

#### 1-4: DVD MT PCB (Refer to Fig. 1-4)

1. Remove the 3 screws ①.
2. Remove the 4 screws ②.
3. Remove the DVD MT PCB in the direction of arrow.

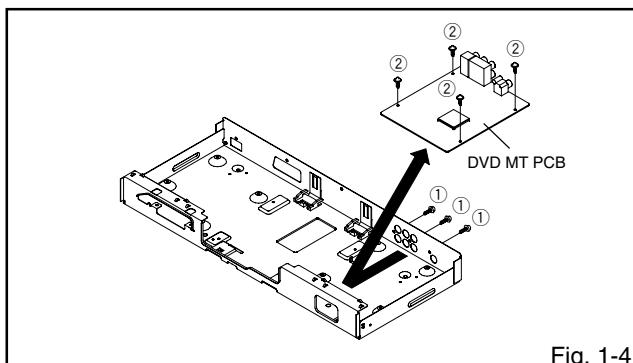

Fig. 1-4

## 4.2 DVD DECK SECTION

### 2. REMOVAL OF DVD DECK PARTS

#### NOTE

1. Disassemble only the DVD DECK PARTS parts listed here. Minute adjustments are needed if the disassembly is done. If the repair is needed except listed parts, replace the DVD MECHA ASS'Y.

#### 2-1: TRAY (Refer to Fig. 2-1-A)

1. Set the Tray opened. (Refer to the **DISC REMOVAL METHOD AT NO POWER SUPPLY**)
2. Unlock the 2 supports ① and draw it while sagging the Tray.

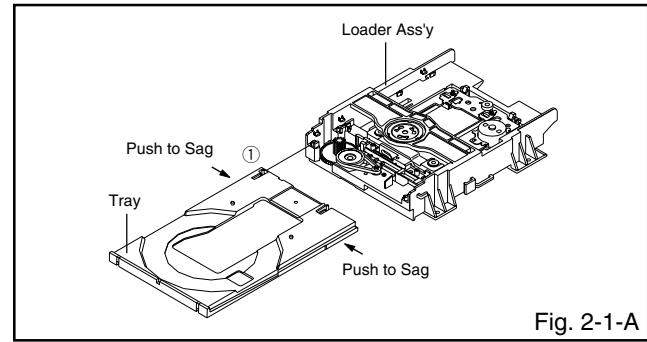

Fig. 2-1-A

#### NOTE

1. In case of the Traverse Ass'y, install it from (1) to (4) in order. (Refer to Fig. 2-2-B)
2. In case of the Traverse Ass'y installation, hook the wire on the Loader Ass'y as shown Fig. 2-2-C.

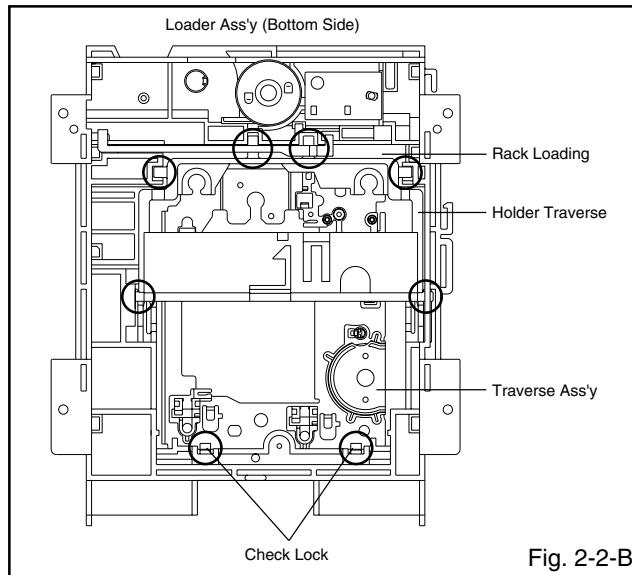

Fig. 2-2-B

B

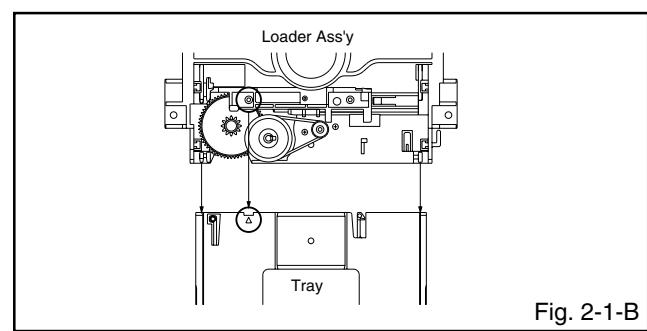

Fig. 2-1-B

#### C NOTE

1. In case of the Tray installation, install them as the circled section of Fig. 2-1-B so that the each markers are met.

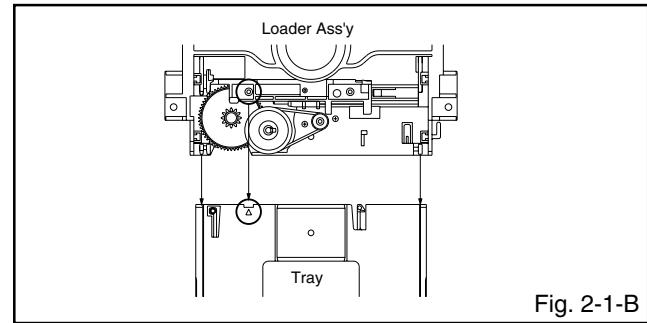

Fig. 2-1-B

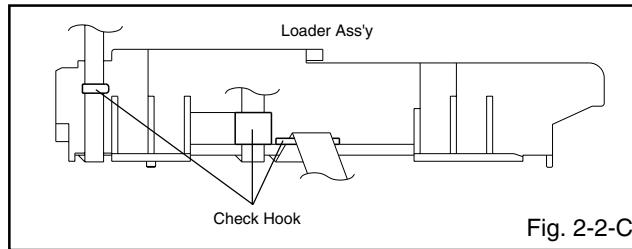

Fig. 2-2-C

#### 2-3: LOADING MOTOR PCB ASS'Y/ LOADING BELT (Refer to Fig. 2-3-A)

1. Remove the Loading Belt.
2. Remove the screw ①.
3. Remove the Loading Motor PCB Ass'Y.
4. Remove the 2 screws ②.
5. Remove the Loading Motor.
6. Remove the Gear Pulley.

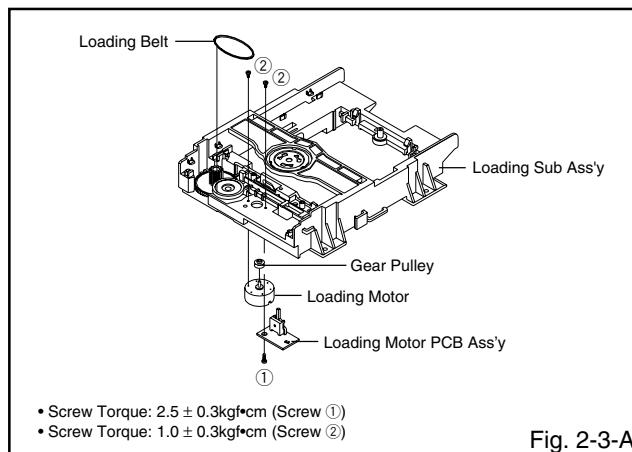

Fig. 2-3-A

E

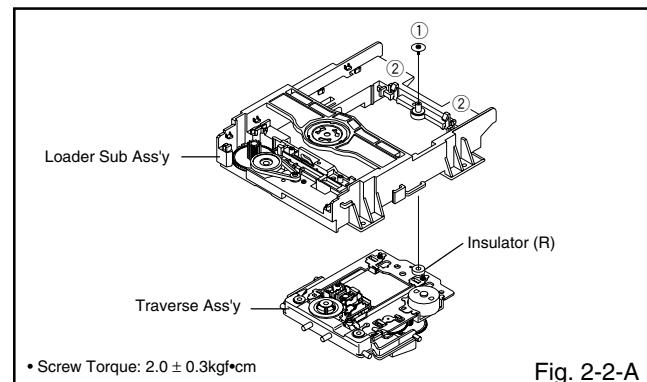

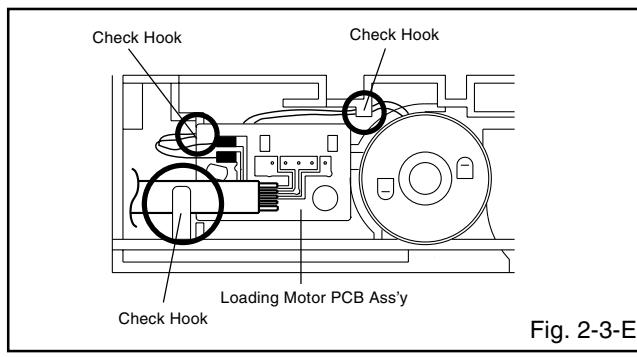

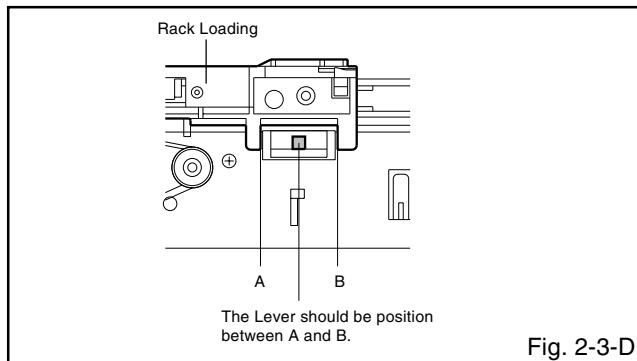

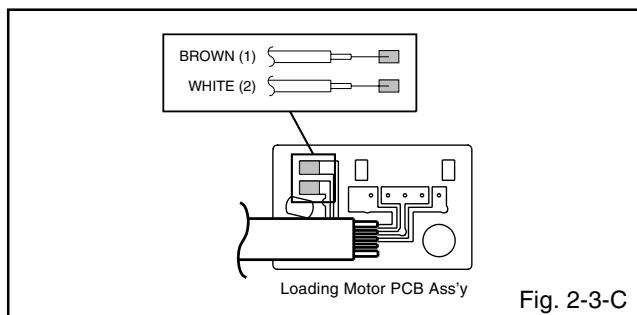

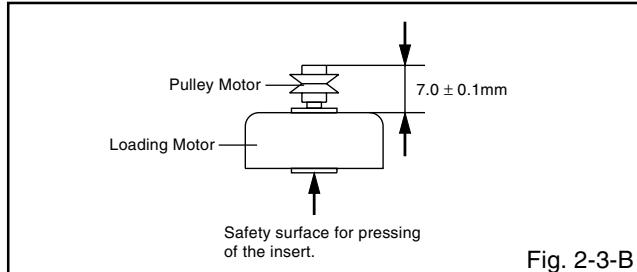

Fig. 2-2-A

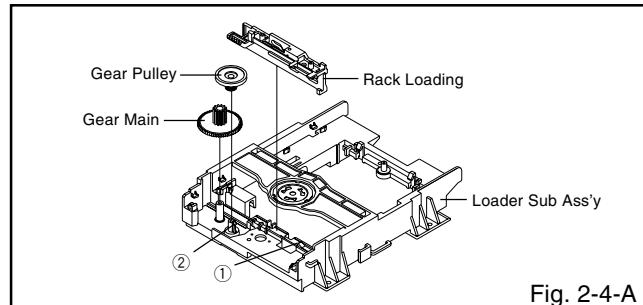

F

**NOTE**

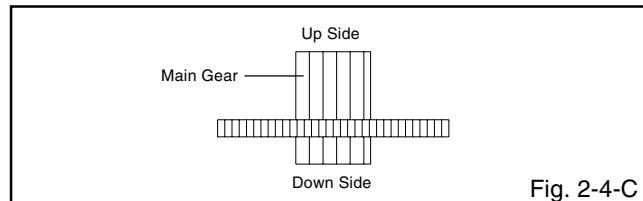

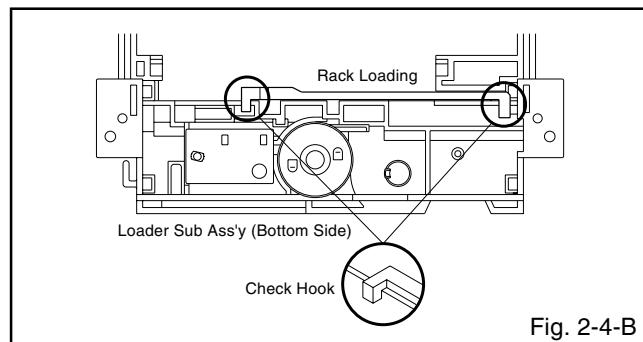

1. In case of the Pulley Motor installation, check if the value of the Fig. 2-3-B is correct.
2. When installing the wire of the Loading Motor PCB Ass'y, install it correctly as Fig. 2-3-C.
3. Manual soldering conditions
  - Soldering temperature:  $320 \pm 20^\circ\text{C}$
  - Soldering time: Within 3 seconds
  - Soldering combination: Sn-3.0Ag-0.5Cu
3. When installing the Loading Motor PCB Ass'y, install it correctly as Fig. 2-3-D.
4. In case of the Loading Motor PCB Ass'y installation, hook the wire on the Loader Sub Ass'y as shown Fig. 2-3-E.

**2-4: RACK LOADING/MAIN GEAR/PULLEY GEAR  
(Refer to Fig. 2-4-A)**

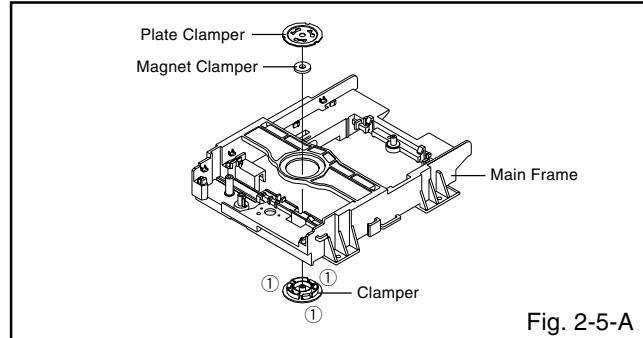

1. Unlock the support ② and remove the Gear Pulley.
2. Remove the Gear Main.
3. Press down the catcher ① and slide the Rack Loading.

**NOTE**

1. In case of the Rack Loading installation, hook the Rack Loading on the Loader Sub Ass'y as shown Fig. 2-4-B.
2. When installing the Gear Main, take care the direction of up or down as shown Fig. 2-4-C.

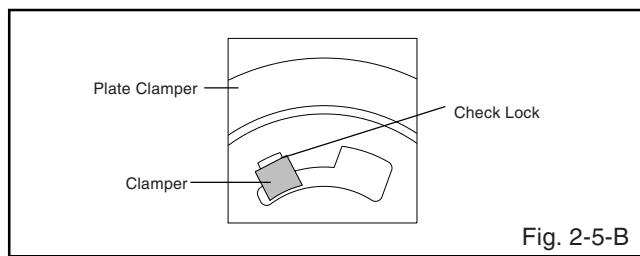

**2-5: CLAMPER ASS'Y (Refer to Fig. 2-5-A)**

1. Press the Clamper and rotate the Plate Clamper clockwise, then unlock the 3 supports ①.
2. Remove the Plate Clamper, Magnet Clamper and Clamper.

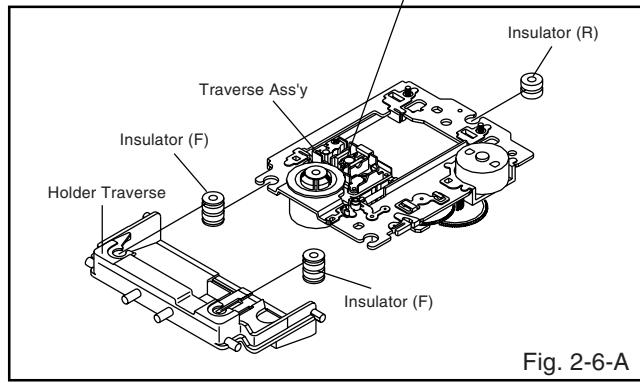

**NOTE**

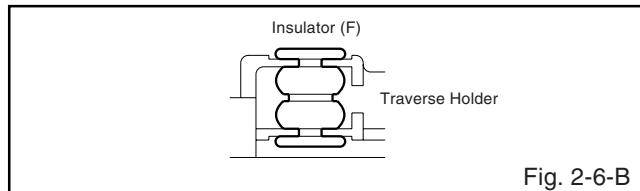

1. In case of the Clamper Ass'y installation, install correctly as Fig. 2-5-B.

**2-6: HOLDER TRAVERSE/INSULATOR (F)/INSULATOR (R) (Refer to Fig. 2-6-A)**

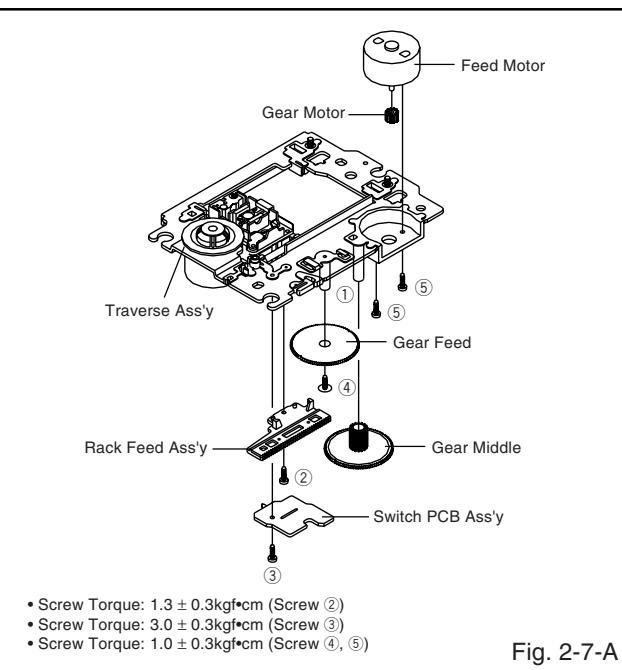

1. Remove the Holder Traverse.  
2. Remove the 2 Insulator (F).  
3. Remove the Insulator (R).

**NOTE**

1. In case of the Insulator (F) installation, install correctly as Fig. 2-6-B.

**2-7: SWITCH PCB ASS'Y/GEAR MIDDLE/GEAR FEED/RACK FEED ASS'Y/FEED MOTOR (Refer to Fig. 2-7-A)**

1. Unlock the support ①.  
2. Remove the Gear Middle.  
3. Remove the screw ②.  
4. Remove the Rack Feed Ass'y.  
5. Remove the screw ③.  
6. Remove the Switch PCB Ass'y.  
7. Remove the screw ④.  
8. Remove the Gear Feed.  
9. Remove the 2 screws ⑤.  
10. Remove the Feed Motor.  
11. Remove the Gear Motor.

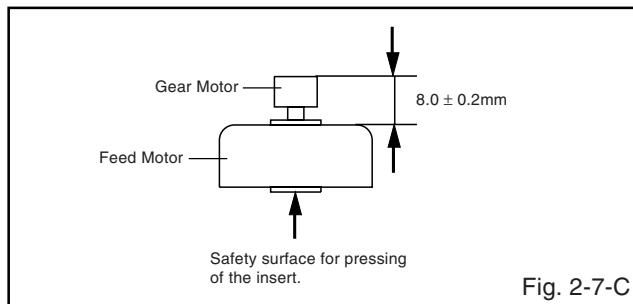

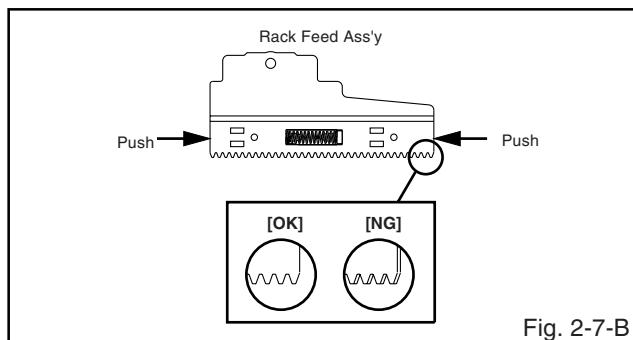

**NOTE**

1. When installing the Rack Feed Ass'y, push both ends to align the teeth as shown Fig. 2-7-B. Then install it.
2. In case of the Gear Motor installation, check if the value of the Fig. 2-7-C is correct.
3. When installing the wire of the Switch PCB Ass'y, install it correctly as Fig. 2-7-D.

Manual soldering conditions

- Soldering temperature:  $320 \pm 20^\circ\text{C}$
- Soldering time: Within 3 seconds
- Soldering combination: Sn-3.0Ag-0.5Cu

4. After the assembly of the Traverse Ass'y, hook the wire on the Traverse Ass'y as shown Fig. 2-7-E.

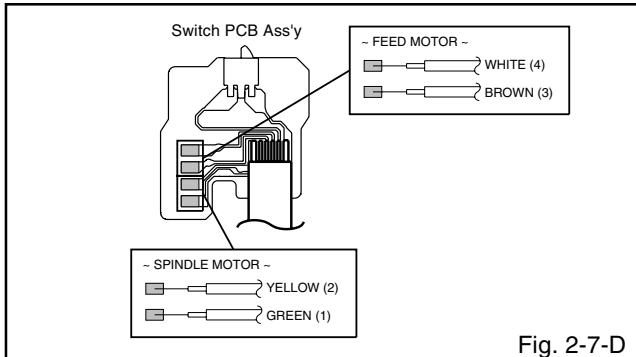

Fig. 2-7-D

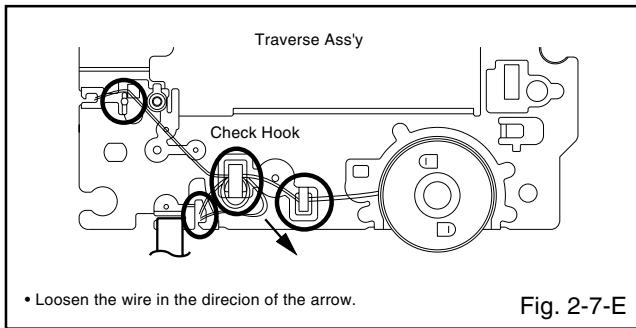

Fig. 2-7-E

## 2-8: FFC WIRE HANDLING

1. When installing the FFC, fold it correctly and install it as shown from Fig. 2-8.

### NOTE

1. Do not make the folding lines except the specified positions for the FFC.

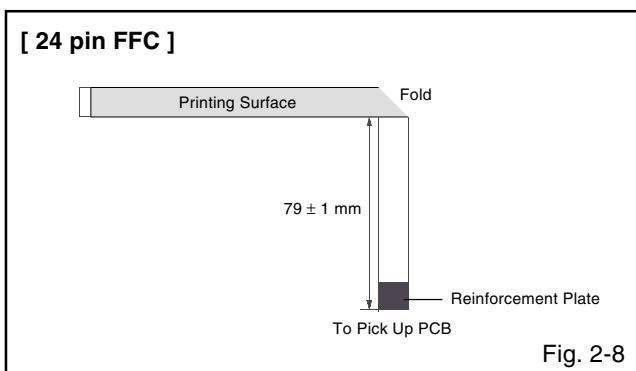

Fig. 2-8

# 5. EACH SETTING AND ADJUSTMENT

## 5.1 PROCEDURES FOR UPDATING THE FIRMWARE

### A 1. Purpose

After replacing the DVD MT PCB Assy, be sure to update the firmware to the latest version. The firmware of the Assy for service may not be the latest.

### 2. Procedures for creating the disc for updating

#### Necessary tools:

- ① PC with a CD-R/CD-RW drive
- ② Blank CD-R or CD-RW
- ③ Firmware file (\*\*\*\*\*.BIN)

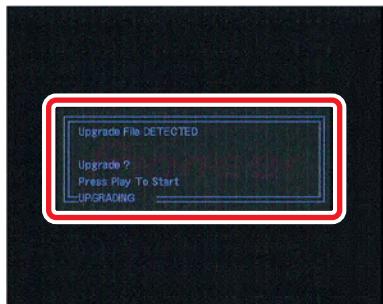

#### How to create:

- B ① Start up the program for writing to CD.
- ② Load a blank disc in the CD-R/CD-RW drive.
- ③ Enter "PIONEER" as the volume label.
- ④ Select the .BIN file.
- ⑤ Write the latest version of the firmware in ISO 9660 format.

### 3. Procedures for updating the firmware

#### How to update:

- ① Turn on the main unit and open the disc tray.
- ② Place the disc for updating in the disc tray and close the tray.
- C ③ Press the PLAY button.

While the screen shown at left is being displayed, updating is in progress.  
**DO NOT TURN OFF THE POWER DURING UPDATING.**

D

- ④ Updating of the firmware is completed.

When the screen with the Pioneer logo is displayed, updating is completed.  
The time required for updating is about 5 minutes.

E

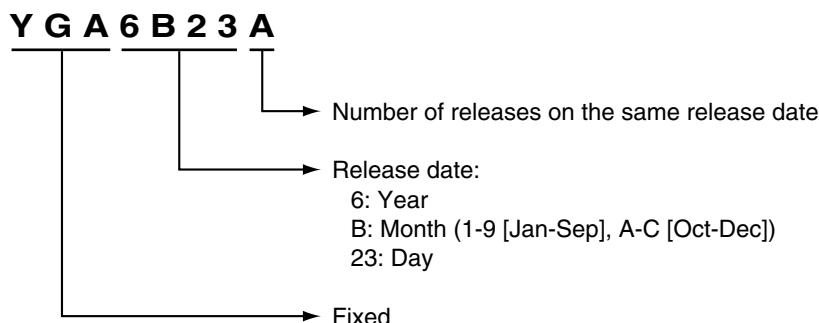

F

#### 4. How to confirm the version of the firmware

Press the ESC then the CHAP key on the remote control unit for servicing. The version of the firmware is labeled ROM NUMBER. Check if the version is the latest one.

|                   |                 |          |
|-------------------|-----------------|----------|
|                   | AREA:WY         | REGION:2 |
| <u>ROM NUMBER</u> | <u>YGA6B23A</u> |          |
| REG CHK           | 40              |          |
| SUM CHK           | 02A5            |          |
| FL VERSION        | 1.16            |          |
| CHIP VERSION      | 1389FE          |          |

How to interpret the version code:

#### 5. Troubleshooting

##### ① If updating of the firmware failed

If the main unit was turned off during updating, it cannot initialize and start up again properly. In such a case, replace the flash ROM on the DVD MT PCB Assy.

##### ② If updating of the firmware using the disc for updating failed

- Was the disc for updating recognized properly?

Check if the volume label of the disc is PIONEER.

- Is playback of a disc other than the disc for updating possible?

If playback of a test CD is also impossible, a reading section, such as PU, may be defective. In such a case, repair the defective part first.

If playback of a test CD is possible, the disc for updating may be defective. Check for any scratches or foreign matter, such as fingerprints, on the reading surface.

If no problem is found with the disc, create a new disc for updating again.

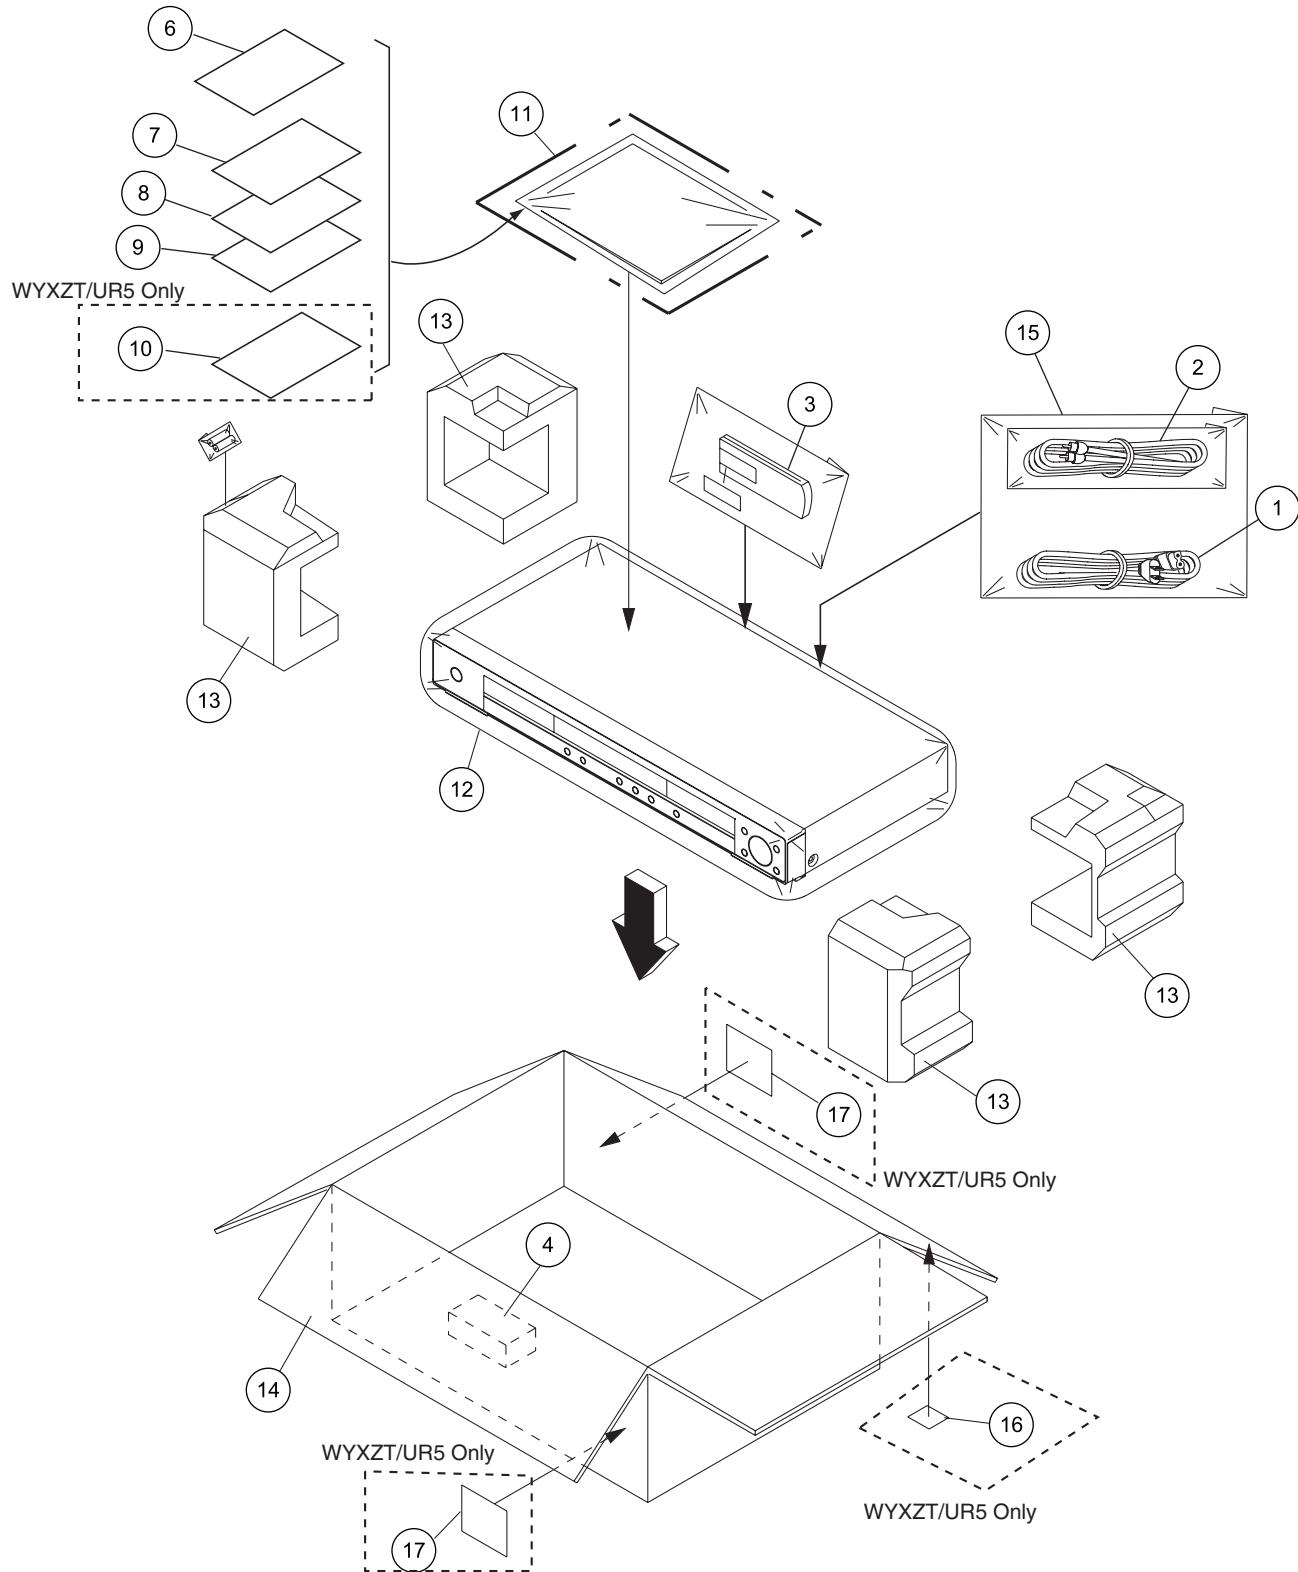

## 5.2 ADJUSTMENT

There is no information to be shown in this chapter.

## 6. EXPLODED VIEWS AND PARTS LIST

NOTES: ● Parts marked by "NSP" are generally unavailable because they are not in our Master Spare Parts List.  
● The  mark found on some component parts indicates the importance of the safety factor of the part. Therefore, when replacing, be sure to use parts of identical designation.  
● Screws adjacent to  mark on product are used for disassembly.  
● For the applying amount of lubricants or glue, follow the instructions in this manual.  
(In the case of no amount instructions, apply as you think it appropriate.)

# 7. SPECIFICATIONS

## 7.1 DISC/CONTENT FORMAT PLAYBACK COMPATIBILITY

### A Disc / content format playback compatibility

This player is compatible with a wide range of disc types (media) and formats. Playable discs will generally feature one of the following logos on the disc and/or disc packaging. Note however that some disc types, such as recordable CD and DVD, may be in an unplayable format see below for further compatibility information.

B Please also note that recordable discs cannot be recorded using this player.

DVD-Video

DVD-R

DVD-RW

Audio CD

Video CD

CD-R

CD-RW

Fujicolor CD

- This unit will play DVD+R/+RW discs.
- **DVD** is a trademark of DVD Format/Logo Licensing Corporation.

-  is a trademark of Fuji Photo Film Co. Ltd.
- Also compatible with KODAK Picture CD

This player supports the IEC's Super VCD standard. Compared to the Video CD standard, Super VCD offers superior picture quality, and allows two stereo soundtracks to be recorded.

Super VCD also supports the widescreen size.

Super VCD

### About DualDisc playback

A DualDisc is a new two -sided disc, one side of which contains DVD content video, audio, etc. while the other side contains non-DVD content such as digital audio material.

The non-DVD, audio side of the disc is not compliant with the CD Audio specification and therefore may not play.

The DVD side of a DualDisc plays in this product.

For more detailed information on the DualDisc specification, please refer to the disc manufacturer or disc retailer.

### CD-R/RW compatibility

- Compatible formats: CD-Audio, Video CD/ Super VCD, ISO 9660 CD-ROM\* containing MP3, WMA, JPEG or DivX video files

\* ISO 9660 Level 1 or 2 compliant. CD physical format: Mode1, Mode2 XA Form1. Romeo and Joliet file systems are both compatible with this player.

- Multi-session playback: No
- Unfinalized disc playback: No
- File structure (may differ): Up to 299 folders on a disc; up to 648 folders and files (combined) within each folder

### DVD+R/DVD+RW compatibility

Only DVD+R/DVD+RW discs recorded in *é*Video Mode (DVD Video Mode)í which have been finalized, can be played back. However, some editing made during the recording may not be played back accurately.

### DVD-R/RW compatibility

- Compatible formats: DVD-Video, Video Recording (VR)\*

\* Edit points may not play exactly as edited; screen may go momentarily blank at edited points.

- Unfinalized playback: No
- WMA/MP3/JPEG file playback on DVD-R/ RW: No

## Compressed audio compatibility

- Compatible formats: MPEG-1 Audio Layer 3 (MP3), Windows Media Audio (WMA)
- Sampling rates: 32 kHz, 44.1 kHz or 48 kHz
- Bit-rates: Any (128 Kbps or higher recommended)
- VBR (variable bit rate) MP3 playback: No
- VBR WMA playback: No
- WMA lossless encoding compatible: No
- DRM (Digital Rights Management) compatible: Yes (DRM-protected audio files will not play in this player.)
- File extensions: .mp3, .wma (these must be used for the player to recognize MP3 and WMA files – do not use for other file types)

## WMA (Windows Media™ Audio) compatibility

This player can playback Windows Media Audio content.

WMA is an acronym for Windows Media Audio and refers to an audio compression technology developed by Microsoft Corporation. WMA content can be encoded by using Windows Media Player for Windows XP, Windows Media Player 9 or Windows Media Player 10 series.

Windows Media is trademark of Microsoft Corporation.

This product includes technology owned by Microsoft Corporation and cannot be used or distributed without a license from Microsoft Licensing, Inc.

## DivX video compatibility

- Official DivX® Certified product.
- Plays all versions of DivX® video (including DivX® 6) with standard playback of DivX® media files.
- File extensions: .avi and .divx (these must be used for the player to recognize DivX video files). Note that all files with the .avi extension are recognized as MPEG4, but not all of these are necessarily DivX video files and therefore may not be playable on this player.

DivX, DivX Certified, and associated logos are trademarks of DivX, Inc. and are used under license.

## JPEG file compatibility

- Compatible formats: Baseline JPEG and EXIF 2.2\* still image files up to a resolution of 3072 x 2048.
- \* File format used by digital still cameras.
- Progressive JPEG compatible: No
- File extensions: .jpg (must be used for the player to recognize JPEG files – do not use for other file types)

## PC-created disc compatibility

Discs recorded using a personal computer may not be playable in this unit due to the setting of the application software used to create the disc. In these particular instances, check with the software publisher for more detailed information.

Discs recorded in packet write mode (UDF format) are not compatible with this player.

Check the DVD-R/RW or CD-R/RW software disc boxes for additional compatibility information.

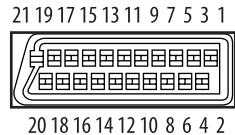

## 7.2 MAIN SPECIFICATIONS

## 9. PCB CONNECTION DIAGRAM

### NOTE FOR PCB DIAGRAMS :

A 1. Part numbers in PCB diagrams match those in the schematic diagrams.  
 2. A comparison between the main parts of PCB and schematic diagrams is shown below.

| Symbol In PCB Diagrams  | Symbol In Schematic Diagrams  | Part Name                |
|---|---|--------------------------|
|  |  | Transistor               |
|  |  | Transistor with resistor |
|  |  | Field effect transistor  |
|  |  | Resistor array           |
|  |  | 3-terminal regulator     |

3. The parts mounted on this PCB include all necessary parts for several destinations.  
 For further information for respective destinations, be sure to check with the schematic diagram.  
 4. View point of PCB diagrams.

# 10. PCB PARTS LIST

NOTES: ● Parts marked by "NSP" are generally unavailable because they are not in our Master Spare Parts List.  
 ● The  $\triangle$  mark found on some component parts indicates the importance of the safety factor of the part. Therefore, when replacing, be sure to use parts of identical designation.  
 ● When ordering resistors, first convert resistance values into code form as shown in the following examples.

Ex.1 When there are 2 effective digits (any digit apart from 0), such as 560 ohm and 47k ohm (tolerance is shown by J=5%, and K=10%).

|              |               |                  |               |     |       |                       |
|--------------|---------------|------------------|---------------|-----|-------|-----------------------|
| 560 $\Omega$ | $\rightarrow$ | $56 \times 10^1$ | $\rightarrow$ | 561 | ..... | RDI/4PU [5] [6] [1] J |
| 47k $\Omega$ | $\rightarrow$ | $47 \times 10^3$ | $\rightarrow$ | 473 | ..... | RDI/4PU [4] [7] [3] J |
| 0.5 $\Omega$ | $\rightarrow$ | R50              | .....         |     |       | RN2H [R] [5] [0] K    |
| 1 $\Omega$   | $\rightarrow$ | IRO              | .....         |     |       | RS1P [I] [R] [0] K    |

Ex.2 When there are 3 effective digits (such as in high precision metal film resistors).

|               |               |                   |               |      |       |                           |
|---------------|---------------|-------------------|---------------|------|-------|---------------------------|
| 562k $\Omega$ | $\rightarrow$ | $562 \times 10^1$ | $\rightarrow$ | 5621 | ..... | RNI/4PC [5] [6] [2] [1] F |

## A • Pin Function

### Abbreviations:

- SR: Slew Rate
- PU: Pull Up
- PD: Pull Down
- SMT: Schmitt Trigger
- 4mA~16mA: Output buffer driving strength.

| Pin                      | Main    | Alt. | Type          | Description  |
|--------------------------|---------|------|---------------|--|
| <b>RF Interface (26)</b> |         |      |               |  |
| 191                      | RFGND18 |      | Ground        | Analog ground  |
| 192                      | RFVDD18 |      | Power         | Analog power 1.8V  |
| 212                      | OSP     |      | Analog output | RF Offset cancellation capacitor connecting  |
| 213                      | OSN     |      | Analog output | RF Offset cancellation capacitor connecting  |
| 214                      | RFGC    |      | Analog output | RF AGC loop capacitor connecting for DVD-ROM   |
| 215                      | IREF    |      | Analog Input  | Current reference input. It generates reference current for RF path. Connect an external 15K resistor to this pin and AVSS |
| 216                      | AVDD3   |      | Power         | Analog power 3.3V  |
| 1                        | AGND    |      | Ground        | Analog ground  |
| 2                        | DVDA    |      | Analog Input  | AC coupled input path A  |
| 3                        | DVDB    |      | Analog Input  | AC coupled input path B  |
| 4                        | DVDC    |      | Analog Input  | AC coupled input path C  |
| 5                        | DVDD    |      | Analog Input  | AC coupled input path D  |
| 6                        | DVDRFIP |      | Analog Input  | AC coupled DVD RF signal input RFIP  |
| 7                        | DVDRFIN |      | Analog Input  | AC coupled DVD RF signal input RFIN  |
| 8                        | MA      |      | Analog Input  | DC coupled main-beam RF signal input A   |
| 9                        | MB      |      | Analog Input  | DC coupled main-beam RF signal input B   |
| 10                       | MC      |      | Analog Input  | DC coupled main-beam RF signal input C   |
| 11                       | MD      |      | Analog Input  | DC coupled main-beam RF signal input D   |
| 12                       | SA      |      | Analog Input  | DC coupled sub-beam RF signal input A  |
| 13                       | SB      |      | Analog Input  | DC coupled sub-beam RF signal input B  |
| 14                       | SC      |      | Analog Input  | DC coupled sub-beam RF signal input C  |
| 15                       | SD      |      | Analog Input  | DC coupled sub-beam RF signal input D  |
| 16                       | CDFON   |      | Analog Input  | CD focusing error negative input   |
| 17                       | CDFOP   |      | Analog Input  | CD focusing error positive input   |
| 18                       | TNI     |      | Analog Input  | 3 beam satellite PD signal negative input  |
| 19                       | TPI     |      | Analog Input  | 3 beam satellite PD signal positive input  |
| <b>ALPC (4)</b>          |         |      |               |  |
| 20                       | MDI1    |      | Analog Input  | Laser power monitor input  |

| Pin   | Main     | Alt. | Type          | Description  |
|---|----------|------|---------------|--|
| 21  | MDI2     |      | Analog Input  | Laser power monitor input                                    |
| 22  | LDO2     |      | Analog Output | Laser driver output  |
| 23  | LDO1     |      | Analog Output | Laser driver output  |
| <b>Reference Voltage (3)</b>                    |          |      |               |  |
| 28  | V2REFO   |      | Analog output | Reference voltage 2.8V                                       |
| 29  | V20      |      | Analog output | Reference voltage 2.0V                                       |
| 30  | VREFO    |      | Analog output | Reference voltage 1.4V                                       |
| <b>Analog Monitor Output (7)</b>                |          |      |               |  |
| 24  | SVDD3    |      | Power         | Analog power 3.3V  |
| 25  | CSO      | RFOP | Analog output | 1) Central servo<br>2) Positive main beam summing output     |
| 26  | RFLVL    | RFON | Analog output | 1) RFRP low pass, or<br>2) Negative main beam summing output |
| 27  | SGND     |      | Ground        | Analog ground  |
| 31  | FEO      |      | Analog output | Focus error monitor output                                   |
| 32  | TEO      |      | Analog output | Tracking error monitor output                                |
| 33  | TEZISLV  |      | Analog output | TE slicing Level   |
| <b>Analog Servo Interface (8)</b>               |          |      |               |  |
| 204   | ADCVDD3  |      | Power         | Analog 3.3V power for ADC                                    |
| 205   | ADCVSS   |      | Ground        | Analog ground for ADC  |
| 206   | RFVDD3   |      | Power         | Analog power   |
| 207   | RFRPDC   |      | Analog output | RF ripple detect output                                      |
| 208   | RFRPAC   |      | Analog Input  | RF ripple detect input (through AC-coupling)                 |
| 209   | HRFZC    |      | Analog Input  | High frequency RF ripple zero crossing                       |
| 210   | CRTPLP   |      | Analog output | Defect level filter capacitor connecting                     |
| 211   | RFGND    |      | Ground        | Analog Power   |
| <b>RF Data PLL Interface (9)</b>                |          |      |               |  |
| 195   | JITFO    |      | Analog output | Output terminal of RF jitter meter                           |
| 196   | JITFN    |      | Analog Input  | Input terminal of RF jitter meter                            |
| 197   | PLLVSS   |      | Ground        | Ground pin for data PLL and related analog circuitry         |
| 198   | IDACEXLP |      | Analog output | Data PLL DAC Low-pass filter                                 |
| 199   | PLLVDD3  |      | Power         | Power pin for data PLL and related analog circuitry          |
| 200   | LPFON    |      | Analog Output | Negative output of loop filter amplifier                     |
| 201   | LPFIP    |      | Analog Input  | Positive input terminal of loop filter amplifier             |
| 202   | LPFIN    |      | Analog Input  | Negative input terminal of loop filter amplifier             |
| 203   | LPFOP    |      | Analog Output | Positive output of loop filter amplifier                     |
